RDLC Report in c# Windows Form

How to create rdlc report c# with sql server database.

Steps followed.

1. Creating new windows form
2. Installing Packages
   a) System.Data.SqlClient
   b) ReportViewerCore.WinForms
   c) Corrected.Microsoft.ReportingServices.ReportViewerControl.Winforms
3. Adding data source having name as MonthlyResultsTbl with data table as given below

   > SELECT
   > NULL AS Fyear,
   > NULL AS FyearName,
   > NULL AS Month_Year,
   > 0 AS Revenue_Amt,
   > 0 AS Net_Result

4. Adding rdlc report
5. Adding char to rdlc report and adding dataset with name as ds_FinancialReport
6. Adding code to MasterForm_Load function:
   a) to declare connection string
   b) to write sql query to get data from the function called PerformanceDB.dbo.fn_MonthlyPerformanceData()
   c) getting data to datasource as datatable
   d) passing on the dataset "ds_FinancialReport"
7. Improving the look and feel of the report by adding dual color, formatting labels, alignment of labels, adding title and formatting title, formatting x axis labels, numeric value formatting in thousands with k

8. Formula to format Month_Year and get only Month Name for the x axis label:

   =FORMAT(Fields!Month_Year.Value, "MMM")

9. Formula to number from 1 to 12 from Month_Year for sorting from April to March

   > =IIF(MONTH(Fields!Month_Year.Value) >= 4,
   > MONTH(Fields!Month_Year.Value) - 3,
   > MONTH(Fields!Month_Year.Value) + 9)

10. Formula to get dual color for the bars in the chart:

   =IIF(Fields!FyearName.Value="CYEAR","#5ecdc4","#fb8784")
